Sandy McQueen Reviews the USANA Business Model

USANA is one of the most popular multilevel marketing programs around. Unfortunately when the term 'multilevel marketing' is used this causes many consumers to skip over this productive opportunity.

Avon, IN — USANA has become one of the most talked about business opportunities to ever be launched. As with any money making opportunity, many consumers are asking the question of whether the [USANA scam](#) is true or not. One internet marketer and entrepreneur, Sandy McQueen has set out to answer this question once and for all. She has thoroughly evaluated the USANA business model and looked through the core concepts of the program to see whether it will yield the results it promises.

The post offers a comprehensive and unbiased insight into the USANA program, and McQueen uncovers each aspect of the program. Described as a multilevel marketing system, the USANA system offers consumers the opportunity to earn steady, solid and reliable part-time or full-time incomes depending on how much time they choose to invest in their business. As McQueen explains in the article, users of the USANA money making program will be required to put in serious amounts of effort and work.

The system is not a “free pass” to making money online. Instead, it is a program that offers users the chance to start their own business, and earn a solid income depending on how much effort they put into growing their business. The company offers the highest quality of supplements and personal care products so selling the merchandise should not be a problem. In fact, the bottom line is the [USANA scam](#) is untrue and this business model should be placed at the top of a prospective entrepreneur’s list of companies to consider for a home based business.
